YALE UNITY
SLIM SMART LOCK

A smart, sleek, secure way to lock your door.

Introducing the Yale Unity Slim Smart Lock. A keyless, secure, and user-friendly smart lock perfect for front entry and utility doors. Available on our Quantum and Crestlite hinged door products.

YALE UNITY
SLIM SMART LOCK

A smart, sleek, secure way to lock your door.

- 100% key-free with built-in keypad for easy access anytime.

- Multipoint locking system for added security and peace of mind. Simply lift the handle to secure your door.

- Lock and unlock anytime with the Yale Home App, built for iOS and Android.

- Auto unlock your door as you walk up without the need to take out your phone.

- Built-in door position sensor will notify if the door is properly closed and locked, for added security.

- The handle runs on 4x AA batteries, with up to 12 months of life (no hardwiring required).

- Both the lock and the Yale Home App will notify when its batteries are running low and need replacing. However, if the lock batteries do run flat, a USB-C cable and a phone or power bank are enough to recharge the lock.

- Designed and tested to handle Australia's harshest conditions with a powder-coated diecast body and handle, plus a UV-protected screen.
