

# SET YOUR OWN TREND WITH QUANTUM<sup>®</sup>

## Cavity Stacker Doors

Contemporary living is all about embracing a more casual approach where family and friends drift effortlessly between the indoors and outdoors and spontaneous gatherings become regular events. And it's all made possible by Trend's Quantum Cavity Stacker Door.

Gliding smoothly out of sight, the Quantum Cavity Stacker creates a broad opening that's perfect for taking advantage of Australia's easy-going, outdoor lifestyle. And thanks to its streamlined installation process, the Quantum puts this design feature in reach of more people than ever before.

Trend can provide builders with the cavity dimensions upfront, meaning the cavity can be built earlier during the building process and Trend can simply come in and fit the doors.

And while these doors will usually be installed under alfresco areas, Trend has ensured the Cavity Stacker provides complete protection against the elements.

So give your home a Quantum leap in both design and liveability.

**Separate spaces...**

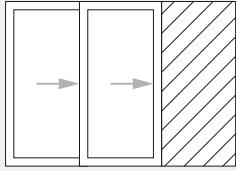

**...suddenly seamless.**
